

SERVING THE WORLD WITH THE LOVE OF JESUS

PROJECT WORLD MISSION 9:22

What is going on in Honduras?

Just as COVID-19 has impacted our lives here in the States, Honduras also is in a five-month quarantine. Citizens of Honduras are only allowed to leave their homes once every two weeks. The government uses the last digits of residents' identification to allow them out on a designated day. On that ONE day, all grocery shopping, banking and errands have to be accomplished for the entire family. Recently, the Government moved in to phase one of reopening which means that some hardware stores and restaurants were allowed to reopen along with the hospital, pharmacies and grocery stores. The borders of Honduras remain closed and the only people allowed to enter are citizens or those with legal residency. COVID-19 numbers seem to be trending down. We are believing Honduras will enter phase two of reopening soon!

WHAT IS THE GREATEST NEED?

People are unable to work and without work, there is no source of income; Food is a priority and is the greatest need. People are hungry! If you want to contribute to help purchase food, visit our website @ www.projectworldinc.com

As I embrace the challenges of COVID-19, I find myself overwhelmed by God's goodness. I am learning not to allow myself to get "stuck" in setbacks and focus on the "the way things are NOT", but instead, I am learning to direct my attention to Jesus and the good work He has for me to do. If I am being honest, I find myself "strangely" excited! I am excited about all of the things God has going on. Yes, ministry as I know it, looks different, and selfishly, I wish I was in Honduras leading teams, building houses, helping to feed the children at the feeding center and finishing more projects on the mission home, but I am learning to embrace the change, get quiet with God and listen to what He has for me. I have to believe God has set time in motion and within these times, He has created seasons. So, if I am breathing at this moment, He has created me for such a times as this.

Thankfully, the work of the ministry has continued since the quarantine began in March. With Jorge and Yesi in Honduras and running the ministry, Project World-Mission 9:22 can continue the work on the mission home. In the pictures, you will find the floors in the mission home have been poured, and a fresh water cistern has been dug and is ready for use. Work is good thing! It provides income for food to be purchased for several families in the Tizate community. Funds also have been donated to continue the work on the security fence surrounding the property where the feeding center is located. God is faithful. He continues to meet all needs!

Not only have generous donations made it possible to hire laborers to work on the ministry property, but we also continue to receive monthly donations to continue the distribution of food bags. Currently, food bags are being distributed on a regular basis to Tizate and the surrounding communities, as well as, the ministry has provided food for the community of Australia in Tegucigalpa.

-Marty
